

**Supplement C**

**Imagery Products & Analytic Products Rights—U.S. Government (USG)**

This Supplement is incorporated by reference into our General Terms and forms a part of the Order Agreement to which you and we are Parties. Capitalized terms used without definition in this Supplement have the corresponding meaning set forth in the General Terms, except that, for purposes of this Supplement only, (a) “Licensed Material” is limited to the Imagery Products and/or Analytic Products that are delivered or otherwise made available for your use as set forth in this Supplement C and the Order Agreement and (b) “Licensed User” has the modified meaning set forth in Section 1 below.

This Supplement C applies only to our U.S. government (“USG”) customers.

As further detailed below, we currently support 6 licensing types, each of which is separately referenced in our Price List:

- USG Type-0 (Ordering Agency + Authorized Contractors)
- USG Type-1 (National Security)
- USG Type-2 (National Security Plus)
- USG Type-3 (USG)
- USG Type-4 (USG Plus)
- USG Type-5 (Public Release)

USG Type-0 applies, and is priced accordingly, where a single USG entity wishes to license Licensed Materials for its own internal use and with authorized contractors associated with the USG agency. The remaining licensing types provide tiered usage and sharing options. In all cases, the associated licensing rights are based on and intended to be consistent with the licensing schema for remotely sensed data developed by the National Reconnaissance Office (NRO) and adopted by National Aeronautics and Space Administration. For example, the definitions of Value-Added Products and Derived Products in the General Terms are based the corresponding NRO defined terms. If you request, we will execute separately the applicable NRO end user license agreement (each, an “NRO EULA”) for the corresponding USG Type-1 through Type-5 license, as follows, and as such NRO EULAs may be updated from time to time by the NRO and for which we may make corresponding updates to this Supplement C and the Order Agreement:

<b>License Type</b>	<b>NRO EULA</b>
USG Type-1	NS-20211007 - National Security End User License Agreement
USG Type-2	NSP-20211007 - National Security Plus End User License Agreement
USG Type-3	USG-20211007 - United States Government End User License Agreement
USG Type-4	USGP-20211007 - United States Government Plus End User License Agreement
USG Type-5	PUB-20211007 - Public Release End User License Agreement

Consistent with the General Terms, your purchased license level may be designated in the Order Agreement, and you may move to a higher license level at any time upon written notice to us and payment of the price differential between your then-current level and the higher license level.

We have incorporated this Supplement C into the Order Agreement to make it seamless for you to access our full suite of Products and Services, including our Platform and BlackSky Events, without the requirement for you to navigate separate end user terms. Consistent with Supplement B, we acknowledge that (a) any provisions in this Supplement C, the Order

Agreement or the NRO EULAs that conflict with USG regulations are hereby superseded by the USG regulations to the extent required by applicable law and (b) any inconsistencies among the Order Agreement, the NRO EULAs, this Supplement C and the remainder of the Order Agreement will be resolved in that order.

Please let us know if you require a different licensing scheme for particular Licensed Materials. We will work with you to execute a separate writing or update this Supplement C to incorporate that schema as well.
